BLACK WOMEN IN THE LABOR FORCE

There were about 10.2 million Black women in the civilian labor force in 2015, representing 1 in 7 women in the labor force. Of those, 9.3 million were employed.

On average, Black women tend to have less favorable outcomes than their White, non-Hispanic counterparts. Black women still face a stark wage gap and are less likely to work in higher-paid occupations. Raising the minimum wage, closing the wage gap, ensuring adequate working conditions and expanding opportunities for higher wage occupations would greatly impact the lives of Black women and their families.

The data below highlight the outcomes of Black women, and compare them to their White, non-Hispanic counterparts as a reference group.

LABOR FORCE PARTICIPATION RATE

Historically, Black women have had high labor force participation rates compared to other women. In 2015, they were still more likely to be employed or actively looking for work.

FAMILIES WITH CHILDREN HEADED BY SINGLE WORKING MOTHERS

In 2014, 4 in 10 Black families with children under 18 were headed by a single working mother.

POVERTY RATE

One third of Black families with children headed by a single working mother were in poverty.

Lost annual earnings:

- Black women: -$7,186
- Black men: -$8,289
- White, non-Hispanic women: -$21,937
- White, non-Hispanic men: -

Note: *Refers to families with children under 18 with a working female householder, no spouse present. Single includes people whose marital status is other than married, spouse present. Household refers to the person (or one of the people) in whose name the housing unit is owned or rented or, if there is no such person, any adult member, excluding roomers, boarders, or paid employees.

**OCCUPATIONS**

Management, professional and related occupations have employed the largest share of Black women since 2009, when the share employed in this category first exceeded that of sales and office occupations. The share of Black women employed in management, professional and related occupations has continued to gradually increase over time, but is still below the share of White, non-Hispanic women employed in these occupations.
