Foreword from the Assistant Secretary

Communities throughout the country are both realizing the benefits and facing the demands of the global economy. One of the constant challenges is identifying, educating, or attracting human talent, which is perhaps the most important element in remaining competitive. Big cities and small towns alike are looking for hard-working, talented individuals who will make their respective regions home. When able, willing, and qualified U.S. workers are not available locally, employers begin looking abroad.

The Office of Foreign Labor Certification (OFLC), which is located within Employment and Training Administration (ETA) at the Department of Labor (Department), has been delegated the responsibility outlined in the Immigration and Nationality Act (INA) for the Secretary of Labor to protect U.S. workers against adverse impact on their wages or working conditions by ensuring U.S. employer compliance with statutory requirements when they hire foreign workers to fill workforce shortages. The Department's focus in these immigrant and nonimmigrant employment-based programs is to ensure the integrity of the process in order to protect U.S. workers and their ability to access jobs.

The INA sets the framework for the Secretary of Labor to follow in adjudicating employer labor certification and labor condition applications used in the D-1, E-3, H-1B, H-1B1, H-2A, H-2B and Permanent Labor Certification programs. The Secretary has delegated this responsibility to ETA. ETA, in coordination with the Department's Office of the Assistant Secretary for Policy, the Office of the Solicitor, and the Wage and Hour Division, which oversees the INA's corresponding enforcement provisions, develops the policies and procedures in the foreign labor certification programs that are then implemented by OFLC.

This report provides a glimpse at the Department's role in supporting the dynamic U.S. economy through OFLC. This report presents employment-based foreign labor certification program data drawn from applications submitted to and adjudicated by the Department from employers who sought labor certifications in fiscal year 2015. An approved labor certification or labor condition application is often the first step in the process for many of the employment-based visa programs, both temporary and permanent, that enable employers to hire foreign workers where workforce needs cannot be fulfilled through the U.S. workforce. In FY 2015, OFLC processed 711,820 employer applications for 1,580,778 positions for temporary and permanent labor certifications. This represents almost a 20 percent increase in the overall number of processed applications from the previous year and a 23 percent increase in job opportunities.

Information found in this report can be utilized by employers, educators, and the public workforce system to learn about occupations and careers for which employers are seeking foreign talent. ETA remains committed to fulfilling the Department's statutory mandate by protecting U.S. workers, while at the same time helping employers access needed talent.

Portia Wu
Assistant Secretary
Employment and Training Administration

Portia Wu

Introduction

The Immigration and Nationality Act (INA) permits foreign workers to come to the United States to work on either a temporary or permanent basis. The Secretary of Labor (Secretary) plays a crucial role in the administration of certain employment-based visa programs in the INA. In recent years, employment-based immigration has represented approximately 16 percent of our Nation's total documented permanent immigration and about 5 percent of the nonimmigrant entries.

Many of the employment-based nonimmigrant visa categories, as well as two of the employment-based immigrant visa preferences, require a labor certification, labor condition application, or attestation to be filed and approved by the Department of Labor (Department) before an employer may petition the Department of Homeland Security (DHS) for approval under a designated visa program and the would-be employee may then apply to the Department of State (DOS) for a visa.

The Secretary has two fundamental responsibilities outlined in the INA for virtually all of the nonimmigrant and immigrant visa programs administered by the Department. First, he must determine if there are any available, able, willing, and qualified U.S. workers in the area of intended employment. This is accomplished through a test of the labor market. Second, he must ensure that the admission of a foreign worker in the requested position will not have an adverse effect on the wages and working conditions of similarly employed U.S. workers.

The Secretary has delegated labor certification authority to the Employment and Training Administration's Office of Foreign Labor Certification (OFLC). OFLC receives and adjudicates applications from employers seeking to hire and bring foreign workers as immigrants to the U.S. in permanent positions in visa preference categories that require labor certifications. OFLC also adjudicates applications in temporary nonimmigrant employment-based visa categories of H-1B, H-1B1 (Chile/Singapore), and E-3 (Australia) for professional and specialty occupations, H-2A for seasonal agricultural workers, H-2B for nonagricultural temporary workers, and D-1 for foreign longshore workers.

Employers must comply with all applicable laws and regulations relevant to the particular employment-based visa program under which they are applying. In most of the Department's employment-based programs, employers must demonstrate that they have made efforts to recruit U.S. workers for the positions for which they are seeking foreign workers and guarantee that they will at least pay the required prevailing wage for the occupation in the area of intended employment.

Receiving a labor certification is only the beginning of the employment-based process to access an immigrant or nonimmigrant. The employer must then submit a petition to DHS's U.S. Citizenship and Immigration Services, and the employee may need to apply to DOS for the issuance of a visa by which the worker enters the U.S. Each individual worker must meet admission standards and requirements listed in the INA. However, some visa categories have numerical limitations or caps set by Congress, which may restrict worker availability during certain times or seasons.

OFLC's National Office is responsible for policy and program oversight of the non-enforcement responsibilities delegated to the Secretary under the INA. OFLC operates three National Processing Centers (NPCs) for the adjudication of applications. The one in Chicago, IL is responsible for adjudicating temporary nonimmigrant labor certification applications. The center in Atlanta, GA adjudicates permanent immigrant labor certification applications. The third center in Washington, DC processes requests for prevailing wage determinations (PWDs), which are required for applications in most OFLC programs.

The three NPCs are responsible for carrying out both operational and certain prescribed administrative functions. The administrative functions include providing help desk assistance from which employers and stakeholders can obtain specific case updates and general application information. Program operations are handled by directors, certifying officers, and analysts who together review and adjudicate applications submitted by employers, ensuring compliance with all applicable statutes, regulations and relevant case law. The administrative staff also handles Freedom of Information Act (FOIA) requests, data entry, case initiation, and IT functions.

Most of OFLC's application and determination processes are fully electronic in either the Department's web-based ICERT Visa Portal System or the Permanent Electronic Review Management System (PERM) portal. The ICERT system contains the Prevailing Wage, Labor Condition Application (LCA; H-1B1/E-3), H-2A, and H-2B Modules, which allow employers to electronically prepare, submit, track, save, reuse, and/or withdraw H-2A, H-2B, and LCA applications or PWD requests, and request PWD redeterminations, through an accessible on-line account. These electronic submission systems are in compliance with the Government Paperwork Elimination Act and are part of the President's e-Government initiative

OFLC Adjudications: 2015

In FY 2015, OFLC processed 711,820 employer applications for 1,580,778 positions for temporary and permanent labor certifications. All programs saw an increase in the number of applications adjudicated from FY 2014.

The National Prevailing Wage Center processed 152,702 PWD requests for use in the PERM, H-1B, H-1B1, E-3, and H-2B programs. This was an increase of 20,658 applications over the previous fiscal year, or 15.6 percent.

The Chicago NPC processed 10,339 applications for H-2A labor certification representing an increase of over 9 percent from the previous fiscal year for a total of 145,874 requested positions and 139,832 certified positions. The H-2B labor certification application adjudications in FY 2015, in which 6,521 applications were processed for 126,138 requested positions, were over 17 percent higher than for the previous fiscal year. H-1B applications saw a 19 percent increase in the number of determinations issued in FY 2015 over FY 2014. The Department processed 605,809 applications, certifying 1,173,149 positions.

In FY 2015, 89,151 permanent labor certification applications were adjudicated, a 25 percent increase from FY 2014, in which 70,998 applications were adjudicated.

Prevailing Wage Determination Process

Prevailing Wage Process – Overview

The National Prevailing Wage Center (NPWC), in Washington, D.C., is responsible for determining prevailing wages for applications received in the temporary and permanent, non-agricultural foreign labor certification programs, including the PERM, H-1B, H-1B1, E-3, and H-2B programs. The purpose of the prevailing wage determination (PWD) process is to ensure job opportunities are offered to workers at a wage that will not adversely affect the wages or working conditions of similarly-employed U.S. workers. PERM and H-2B program applicants are required to obtain a PWD prior to filing their labor certification applications, while H-1B, H-1B1, and E-3 applicants may provide their own wage for their job opportunities, though they are strongly encouraged to take advantage of the “safe harbor” provided by reliance on a PWD issued by the NPWC. The PWD request process is almost entirely electronic, with nearly all applicants submitting their requests through the ICERT Visa Portal System (ICERT). Depending on the program, the PWD the NPWC issues may reflect the average wage of all similarly-employed workers in the occupation, the average wage of workers at the same skill level in the occupation, an agreed-upon collective bargaining wage, or the wage required by the McNamara-O’Hara Service Contract Act or the Davis-Bacon Act.

Prevailing Wage Determinations Issued

The number of PWDs the NPWC issues does not reflect the actual number of labor certification or labor condition applications filed in the various foreign labor visa programs because a single PWD may be used once, more than once, or not at all. However, the number provides an indicator of interest in the programs for which the NPWC issues PWDs. In fiscal year (FY) 2015, the NPWC received a total of 152,884 PWD requests. Of those requests, the NPWC issued a total of 131,037 PWDs, a 4 percent increase over FY 2014. PWD requests in the PERM program accounted for the overwhelming bulk of applications, with the NPWC receiving 132,434 requests, which constitutes 87 percent of all requests. Of those requests, the NPWC issued a PWD for 113,728, which accounted for approximately 87 percent of all issued PWDs. The 13,757 requests in the H-2B temporary nonagricultural certification program made up the second largest share of applications. Of the 13,757 H-2B requests, the NPWC issued a PWD for 11,421, which constituted 8.7 percent of total determinations. The third largest share of determination requests was in the H-1B skilled, professional temporary worker program, for which the NPWC received 6,693 requests. Of these requests, the NPWC issued a PWD for 6,091, which made up roughly 4.6 percent of all determinations. In addition, the NPWC responded to 12,220 help desk inquiries in FY 2015.

Prevailing Wage Determinations Issued by Status

CASE STATUS	H-1B	H-2B	PERM
Determination Issued	6,005	11,206	111,758
Redetermination Review - Affirmed	52	168	882
Redetermination Review - Overturned - Modified	34	47	885
Total	6,091	11,421	113,525

Prevailing Wage Determination Issued by Quarter and Major Visa

QUARTER	H-1B	H-2B	PERM	TOTAL

Top 10 States for Prevailing Wage Determinations

California, Texas, and New York were the three States with the most PWDs issued. The NPWC also issued the greatest number of PERM determinations to employers in these three states. Employers in California received 29,299 total PWDs in FY 2015, more than any other state, followed by Texas, for which the NPWC issued 12,256 PWDs, and New York, for which the NPWC issued 10,069.

Among employers intending to pursue temporary H-1B specialty worker visas, the greatest demand for PWDs appeared in Texas, Florida, California, and Illinois, with the NPWC issuing 809 PWDs for Texas employers, 459 in Florida, 415 in California, and 415 in Illinois. Texas, Massachusetts, Florida, and Pennsylvania employers topped the list of H-2B PWD recipients, with each state accounting for 1,333, 1,009, 711, and 575 PWDs, respectively.

Top 10 States for Wage Determinations by Major Visa Classifications

STATE	DETERMINATIONS	H-1B	H-2B	PERM
California	29,299	415	234	28,650
Texas	12,256	809	1,333	10,114

Top 10 Occupations for Prevailing Wage Determinations

In FY 2015, as is typical, the most requested occupations were in computer-related occupations like Software Developers, Computer Systems Analysts, and Computer and Information Systems Managers.

Total Wage Determinations for the Top 10 Occupations

OCCUPATION	DETERMINATIONS	AVERAGE HOURLY WAGE
Software Developers, Applications	30,599	\$47.67
Computer Systems Analysts	8,224	\$43.87
Software Developers, Systems Software	8,085	\$53.55
Computer and Information Systems Managers	5,625	\$71.20
Landscaping and Groundskeeping Workers	4,181	\$12.29
Electronics Engineers, Except Computer	4,065	\$48.80
Marketing Managers	3,272	\$69.13
Accountants and Auditors	2,510	\$34.87
Network and Computer Systems Administrators	2,012	\$40.31
Financial Managers	1,934	\$70.92

Average Wage for the Top 10 Occupations

Computer and Information System Managers received the highest average hourly wage of the top 10 occupations at \$71.20, an increase of \$1.19 over FY 2014, while Financial Managers earned a similarly high average wage of \$70.92 per hour. Landscaping and Groundskeeping Workers received the lowest average hourly wage of the top 10 occupations at \$12.29, an increase of \$1.01 over FY 2014.

Top Occupations and Employers for Prevailing Wages

The following computer-related occupations constituted over 40 percent of the total PWDs issued: Software Developers (Applications), with 30,599 PWDs issued at an average hourly wage of \$47.67; Computer Systems Analysts, with 8,224 PWDs issued at an average hourly wage of \$43.87; Software Developers (Systems Software), with 8,085 PWDs issued at an average hourly wage of \$53.55; and Computer and Information Systems Managers, with 5,625 PWDs issued at an average hourly wage of \$71.20. Of these occupations, Software Developers (Applications) was by far the most requested, accounting for just over 23 percent of all PWDs.

Among employers requesting workers in the PERM Program, the Microsoft Corporation; Deloitte Consulting, LLP; and Google, Inc. received the most PWDs in FY 2015. Each of these employers was among the top five employers for three of the top four occupations in FY 2015.

Top Five Employers in the Top Four Occupations

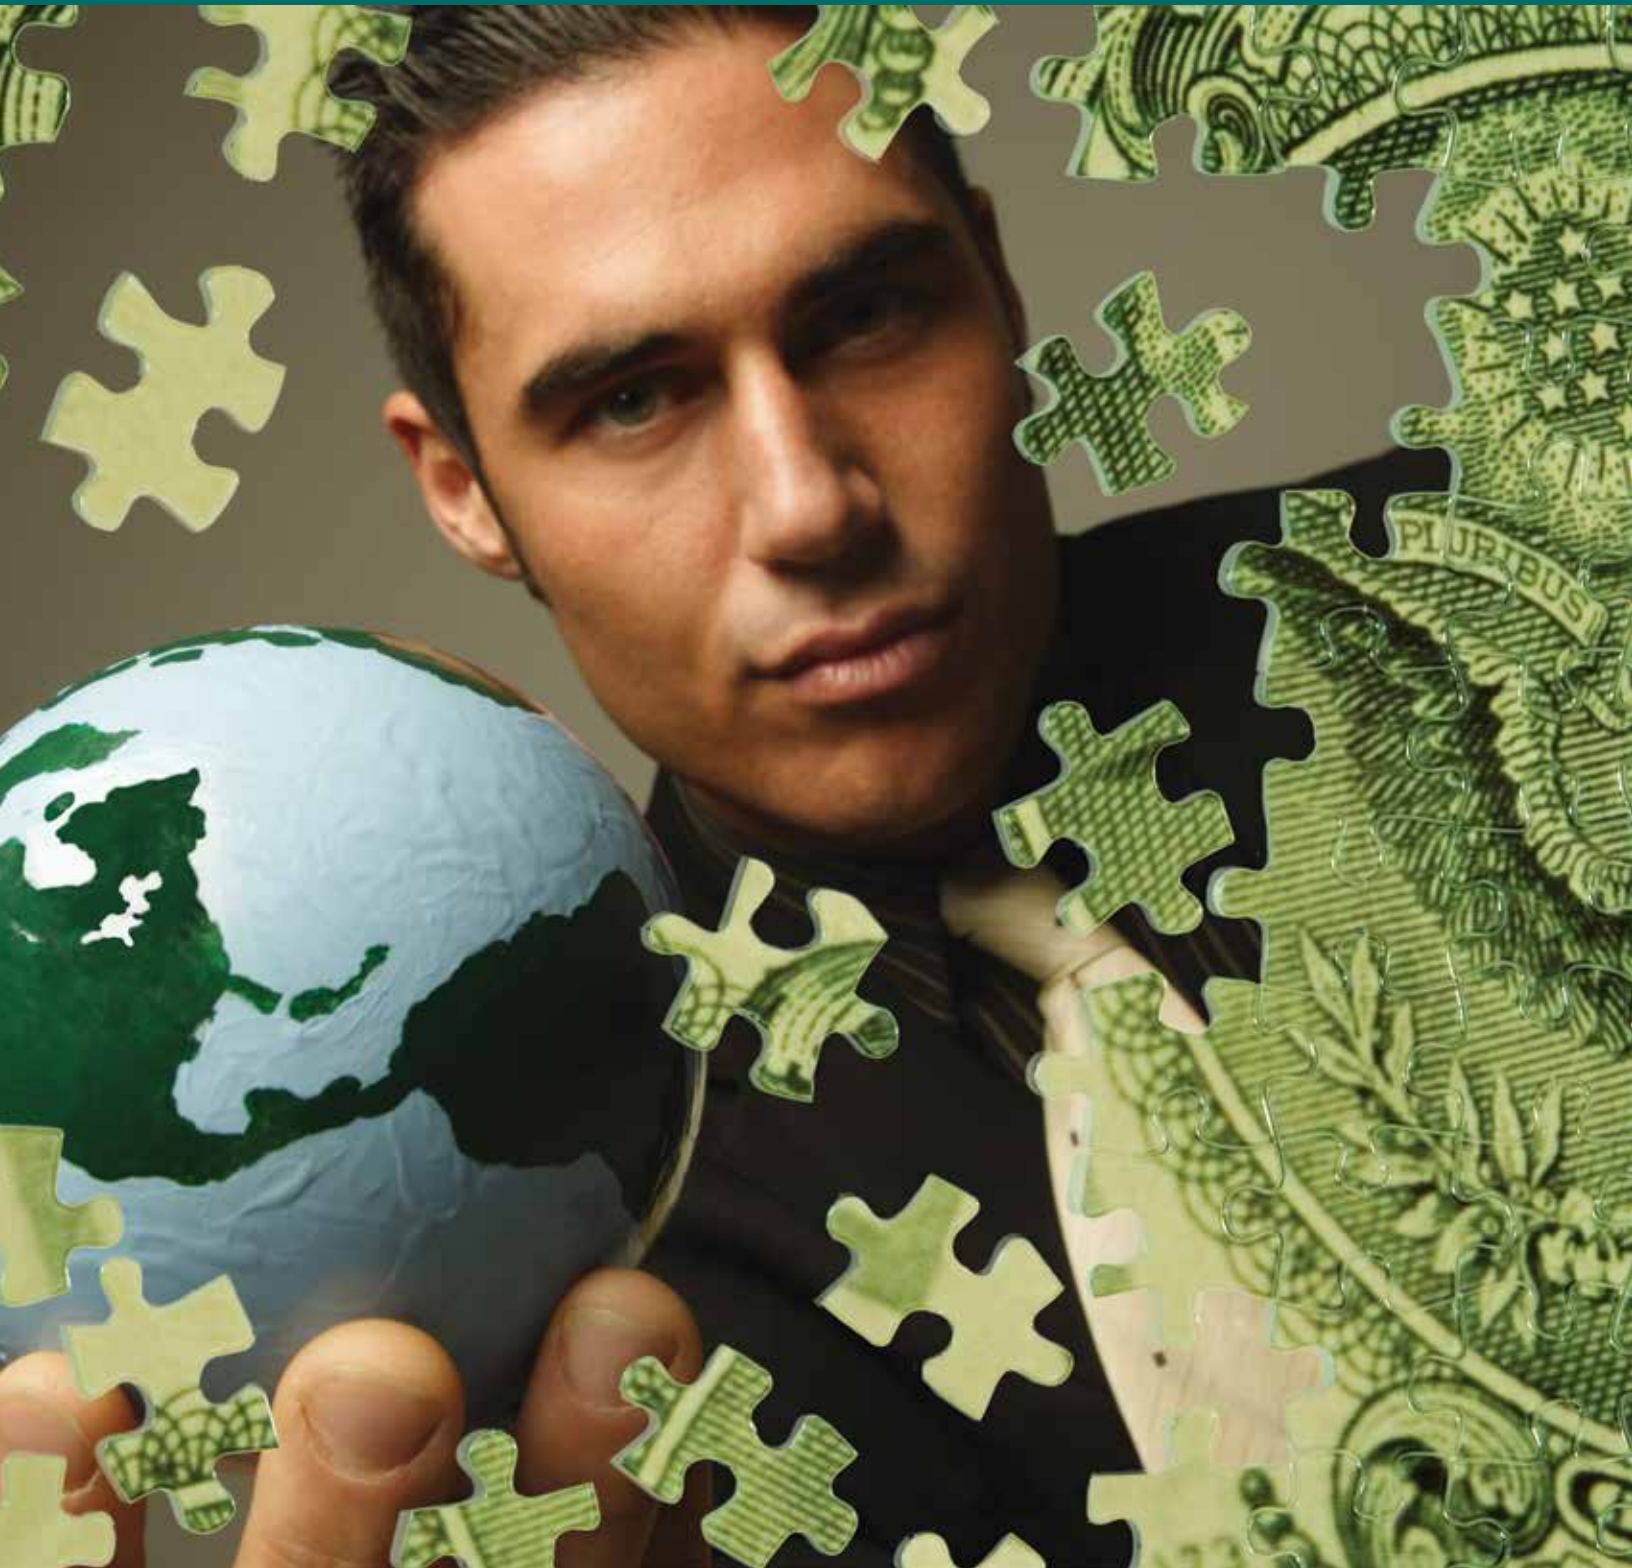

TOP 4 OCCUPATIONS	EMPLOYER

Permanent Labor Certification

Atlanta National Processing Center

The National Processing Center in Atlanta, Georgia (Atlanta NPC) is responsible for processing applications received by OFLC for permanent labor certifications under the INA. The Atlanta NPC adjudicates applications for permanent employment-based immigration filed primarily through the Permanent Electronic Review Management (PERM) online submission system, which employers are encouraged, but not required, to use.

In addition to its adjudication of applications, the Atlanta NPC oversees supervised recruitment for those employers who are required to submit their recruitment plans and results to the Atlanta NPC. The Atlanta NPC staff also oversees PERM audits of employers as part of OFLC's integrity measures and is responsible for preparing files for appeal to the Board of Alien Labor Certification Appeals.

In FY 2015, the Atlanta NPC processed an average of 1,714 applications per week, 7,429 applications per month, and 22,288 applications per quarter. In total, the Atlanta NPC certified 78,938 applications and denied 5,851 applications, and 4,362 applications were withdrawn, for a total of 89,151 applications processed during FY 2015. From the total number of applications processed at the Atlanta NPC in FY 2015, the Appeals unit received 3,209 appeals and processed 1,348 appeals.

The Atlanta NPC had 54,523 pending cases on October 1, 2014 and ended FY 2015 with 54,559 pending cases – only a .07 percent increase in pending caseload.

Summary of the Permanent Labor Certification Program

Under the permanent labor certification program, an employer seeking to hire a foreign worker to work as an immigrant in the U.S. submits an application for labor certification that, if granted, would certify to the Secretary of the Department of Homeland Security (DHS) that there are not sufficient U.S. workers who are able, willing, qualified, and available to perform the services sought, and that the employment of the foreign worker will not have an adverse impact on the wages and working conditions of similarly employed workers in the United States. An employer must obtain a labor certification from DOL before it can submit most types of immigrant visa petitions to the U.S. Citizenship and Immigration Services (USCIS), part of the DHS. The PERM labor certification process utilizes an electronic fillable application.

Prior to submitting an application to initiate the employment-based process in PERM (unless the employer has been placed in supervised recruitment) the employer must test of the labor market to determine whether U.S. workers are able, willing, qualified, and available for the job opportunity in the area where the job will be performed. The test involves mandatory and discretionary advertising at several levels. If there are no such U.S. workers, the employer may file an Application for Permanent Employment Certification with OFLC evidencing the recruitment efforts undertaken and other program information. These and other program-related conditions must be met prior to OFLC granting a permanent labor certification.

In FY 2015, employers filed 87,644 applications, a 17 percent increase from FY 2014 in which 74,936 applications were filed, and a 20 percent increase from FY 2013 in which 72,462 applications were filed.

Twenty-four States each had more than 500 permanent labor certifications in FY 2014. California, Texas, New Jersey, New York, and Illinois were the States with the greatest numbers of permanent labor certifications.

Permanent Labor Certifications by U.S. State and Territory

WORK STATE	POSITIONS CERTIFIED
California	18,675
Texas	13,008
New Jersey	6,257

Permanent Labor Certifications by Top Five NAICS Industry Codes

Most industries, as classified by the North American Industry Classification System (NAICS), experienced significant increases in the number of certifications sought in FY 2015. Together, the top five industries by NAICS code accounted for 82 percent of the total number of permanent labor certifications in FY 2015. The number of permanent labor certifications for occupations listed under the Professional, Scientific, and Technical Services industry accounted for 48 percent of all permanent labor certifications. This industry accounts for the largest number of certifications in the PERM program. The other industries rounding out the top five were Manufacturing (16.78%), Information (7.03%), Finance and Insurance (5.75%), and Educational Services (4.88%).

Occupations with More Than 1,000 Certifications

Employers apply for permanent labor certification in almost every occupational classification. The Department uses the Standard Occupational Classification (SOC) system developed for use by Federal statistical agencies. The occupations in the table below represent those in which more than 1,000 applications were certified in FY 2015. These occupations constitute approximately 59 percent of all permanent labor certifications granted in FY 2015. Of the occupations for which more than 1,000 positions were certified in FY 2015, Software Developers, Applications was the most requested occupation at 33.5 percent of the total positions certified.

Occupations with More Than 1,000 Permanent Labor Certifications

SOC	JOB TITLE	TOTAL POSITIONS CERTIFIED	AVERAGE WAGE OFFER
15-1132	Software Developers, Applications	26,465	\$46.13
15-1121	Computer Systems Analysts	9,800	\$40.18
15-1133	Software Developers, Systems Software	5,218	\$52.76
17-2072	Electronics Engineers, Except Computer	3,024	\$48.64
11-3021	Computer and Information Systems Managers	1,862	\$65.03

Top Five Occupations for Top Five Countries

The largest number of permanent labor certifications in FY 2015 was filed for foreign workers originating from India, China, South Korea, Canada, and the Philippines. Software Developers, Applications; Computer Systems Analysts; Software Developers, Systems Software, and Electronics Engineers comprised the majority of job opportunities certified by employers with foreign workers from India, China, and Canada. The most common occupations for foreign workers from Canada included Meat, Poultry, and Fish Cutters and Trimmers, Accountants and Auditors, and Market Research Analysts/Marketing Specialists. The most common occupations for foreign workers from the Philippines included Medical and Clinical Laboratory Technologists, Home Health Aides, and Occupational Therapists.

States with Most Certifications

California, Texas, New Jersey, New York, and Illinois were the five states with the largest numbers of permanent labor certifications in FY 2015. Within the five states, the occupations with the highest demand in FY 2015 were all in Technology. California, with 18,675 certifications, received almost 24 percent of the total number of permanent labor certifications issued in FY 2015. California's driving industry that received the most permanent labor certifications was Information Technology.

Countries with over 1,000 Certifications

In FY 2015, India remained the country of origin with the most certifications for foreign workers in the permanent labor certification program, and China remained the country of origin with the second highest number of permanent labor certifications. South Korea rounded out the top three countries with the greatest number of certified positions.

Workers from India represented approximately 58 percent of permanent labor certifications approved, while each of the other countries represented approximately 8 percent or less of certifications. The top five countries represented 78 percent of the total number of certifications in FY 2015.

Twenty Five Employers with the Highest Number of Certifications

Cognizant Technology Solutions U.S. Corporation was the employer with the highest number of applications certified during FY 2015, with 7,079 applications. Cognizant Technology Solutions U.S. Corporation filed 37 percent of all applications filed by the top 25 employers. Many of the top 25 employers were technology or computer-related companies. The top three occupations for FY 2015 were Software Developers, Applications; Computer Systems Analysts; and Software Developers, Systems Software. Some of the other occupations certified for the top 25 employers were Electronics Engineers, Marketing Managers, and Accountants and Auditors.

Education in the Permanent Labor Certification Program

Permanent labor certification applications from educational employers accounted for approximately 4.3 percent of the total positions certified in FY 2015, or 3,384 certifications granted. Education, Training, and Library occupations were the most sought positions by Educational employers, with these occupations constituting of 71.47 percent of the educational positions certified, or 2,683 permanent labor certifications. This wide occupational category includes occupations from pre-school, kindergarten, elementary school, middle school, secondary school, and special education teachers, to post-secondary teachers in their various specialty areas. It also includes teaching assistants, self-enrichment education teachers, librarians, curators, archivists, audio-visual and multimedia collections specialists, and instructional designers and coordinators.

In the occupational category with the next highest number of positions certified for educational employers, Computer and Mathematical Occupations, 219 positions were certified, constituting 5.83 percent of the total educational positions certified. Healthcare Practitioners and Technical Occupations constituted 5.67 percent; Management Occupations constituted 3.09 percent and Life, Physical, and Social Science Occupations constituted 1.89 percent, with all other occupations individually accounting for less than 1 percent of the positions certified for educational employers.

Temporary Programs

Chicago National Processing Center

OFLC has two centers exclusively devoted to adjudicating applications for the Secretary of Labor under the INA and one center devoted to determining prevailing wages for employers wishing to hire foreign workers. The National Processing Center (Chicago NPC) in Chicago, Illinois is responsible for processing applications received by ETA from employers throughout the United States that seek temporary workers under the H-2A Agricultural Program, H-2B Non-agricultural Program, H-1B Specialty (Professional) Worker Program (including H-1B1 for Chile and Singapore and E-3 for Australia), and D-1 Crewmember (Longshore) Program.

On average in FY 2015, the Chicago NPC processed 2,146 applications per day, 10,276 applications per week, and 44,531 applications per month for H-2A, H-2B, H-1B, H-1B1, and E-3 programs combined. The Chicago NPC received on average 181 applications per week for the H-2A program, 105 applications per week for the H-2B program, and 9,990 applications per week for the H-1B, H-1B1, and E-3 programs. The Chicago NPC processed two D-1 applications in FY 2015.

Cross-trained analysts enable the Chicago NPC to be more flexible and meet processing goals, as does expanded use of electronic communication and filing capabilities. Direct electronic communications with employers are decreasing mailing costs and increasing efficiency. The help desk e-mail boxes received approximately 58,994 emails in FY 2015, which is higher than the previous year when the Center received over 28,127 help desk inquiries.

Ombudsman Program

The OFLC Ombudsman Program was created in February of 2012 to improve customer service and strengthen stakeholder confidence in OFLC case processing. The Ombudsman Program provides accessible and consistent service to OFLC stakeholders by conducting independent and impartial inquiries into issues related to the administration of the H-2A and H-2B temporary visa programs. The Ombudsman Program answers inquiries on a variety of topics. These include questions from agents and employers regarding case delays, procedural questions on issues such as wages, designation by the Wage and Hour Division as a foreign labor contractor, and inquiries about workers' compensation and surety bonds. The Program also receives inquiries from advocate groups concerned with terms in job orders, alleged nonexistent corporations, recruitment practices, and the temporary nature of the work in an application. The Ombudsman Program also identifies areas in which employers and worker advocate organizations have concerns in dealing with the OFLC and proposes internal recommendations designed to continuously improve the quality of services provided by the OFLC. There is no fee for using the Ombudsman Program.

The Program receives most inquiries by e-mail; however stakeholders also contact the program by mail or fax. Complex issues were sometimes discussed by phone or in person. The Ombudsman Team initially responds to inquiries within one business day and has as its goal to resolve inquiries within 15 days. The Program also conducts outreach regarding program or policy changes, such as website postings and e-mail updates to stakeholders.

The Ombudsman Team tracks all inquiries and follows the resolution of each question or concern, looking for patterns or notable problems to be overcome on a programmatic (rather than case-specific) basis.

Recommendations suggesting a program-wide process or policy change may also result from these inquiries and resulting review.

The Ombudsman's services were most utilized by users of the H-2A program. The number of requests regarding the H-2A program was double those for the H-2B program. Inquiries from agents and attorneys comprised the majority of inquiries. The Ombudsman team's time to resolve inquiries averaged three business days.

Summary of Temporary Labor Certification Programs

The Department issues labor certifications for temporary employment under several nonimmigrant programs in which nonimmigrant workers cannot be admitted to work in the United States unless the employer possesses a valid labor certification or labor condition application. A valid labor certification indicates that the employment of a foreign worker will not adversely affect the wages and working conditions of workers in the United States who are similarly employed and that there are not sufficient U.S. workers to perform the work. OFLC's nonimmigrant programs are H-1B Specialty (Professional) Worker Program; H-1B1 Specialty Worker Program (Chile and Singapore); E-3 Specialty Worker Program (Australia); H-2A (Agricultural) Program; H-2B (Non-Agricultural) Program; and the D-1 Crewmember (Longshore) Program.

OFLC data for FY 2015 shows a 19 percent increase in the number of H-1B applications (not including H-1B1 and E-3) adjudicated and a 20 percent increase in the number of applications certified. The number of positions requested increased by almost 20 percent and so did the number of H-1B positions certified, by 30 percent, in FY 2015.

In the H-2A program, there was more than 9 percent increase in the number of H-2A applications adjudicated and an almost 9 percent increase in the number of applications certified. The number of positions requested increased by 18 percent from FY 2014 to 145,874 positions. In the H-2B program, there were marked increases for the number of applications adjudicated and certified, by 19 and 10 percent, respectively. The number of positions certified for the H-2B program increased by almost 9 percent from FY 2014, to a total of 101,765.

H-1B Temporary Specialty Worker Program- Overview

By law, the H-1B program allows an employer to temporarily employ a foreign worker in the United States in a specialty occupation or as a fashion model of distinguished merit and ability. A specialty occupation requires the theoretical and practical application of a body of specialized knowledge and a bachelor's degree or its equivalent in education and/or experience in the specialized discipline (e.g., Science, Medicine and Healthcare, Education, Biotechnology, and Business Specialties). Current law limits the number of foreign workers who may be issued a new H-1B visa to 65,000 each fiscal year, with certain exceptions, with an additional 20,000 visas designated for those possessing advanced degrees earned at U.S. institutions. A Labor Condition Application (LCA) is filed with OFLC for processing; OFLC reviews the document, which contains the employer's attestations to its obligations in the H-1B program, for obvious errors and omissions and certifies the Department's acceptance of the attestations.

Top Three H-1B Occupations

FY 2015 data for OFLC indicated an increase in demand for job opportunities for H-1B workers who are educated and skilled in specialized occupations compared to 2014. There was a 20 percent increase in the number of H-1B positions requested and a 24.6 percent increase in the number of positions certified compared to FY 2014. As has been the case in previous years, the top three occupations for positions certified were all computer-related occupations, with Computer Systems Analysts representing over 28 percent of the total H-1B positions certified (332,229 positions) in FY 2015, which is more than twice as much as the next two combined.

Top Three Occupations for H-1B Certified Positions

TOP THREE OCCUPATIONS	TOTAL H-1B APPLICATIONS CERTIFIED	TOTAL H-1B POSITIONS CERTIFIED	CERTIFIED APPLICATIONS AS % OF ALL H-1B APPLICATIONS	CERTIFIED POSITIONS AS % OF ALL CERTIFIED H-1B POSITIONS

Top 10 Employers for H-1B and the Top Occupations and Work States

Deloitte Consulting LLP was the top employer for H-1B positions certified in FY 2015, with 118,406 positions certified, making up over 10 percent of the total number of H-1B positions certified this fiscal year.

California was the top work state for 3 out of the top 10 H-1B employers. In FY 2015 Texas, New York, New Jersey, and Illinois rounded out the top states for the top 10 H-1B employers. Most of the top 10 H-1B employers' top occupations were in the computer related fields such as computer systems analysts and computer programmers. Occupations in Marketing, Accounting, and General Management covered the rest.

States with More Than 5,000 Certified H-1B LCAs

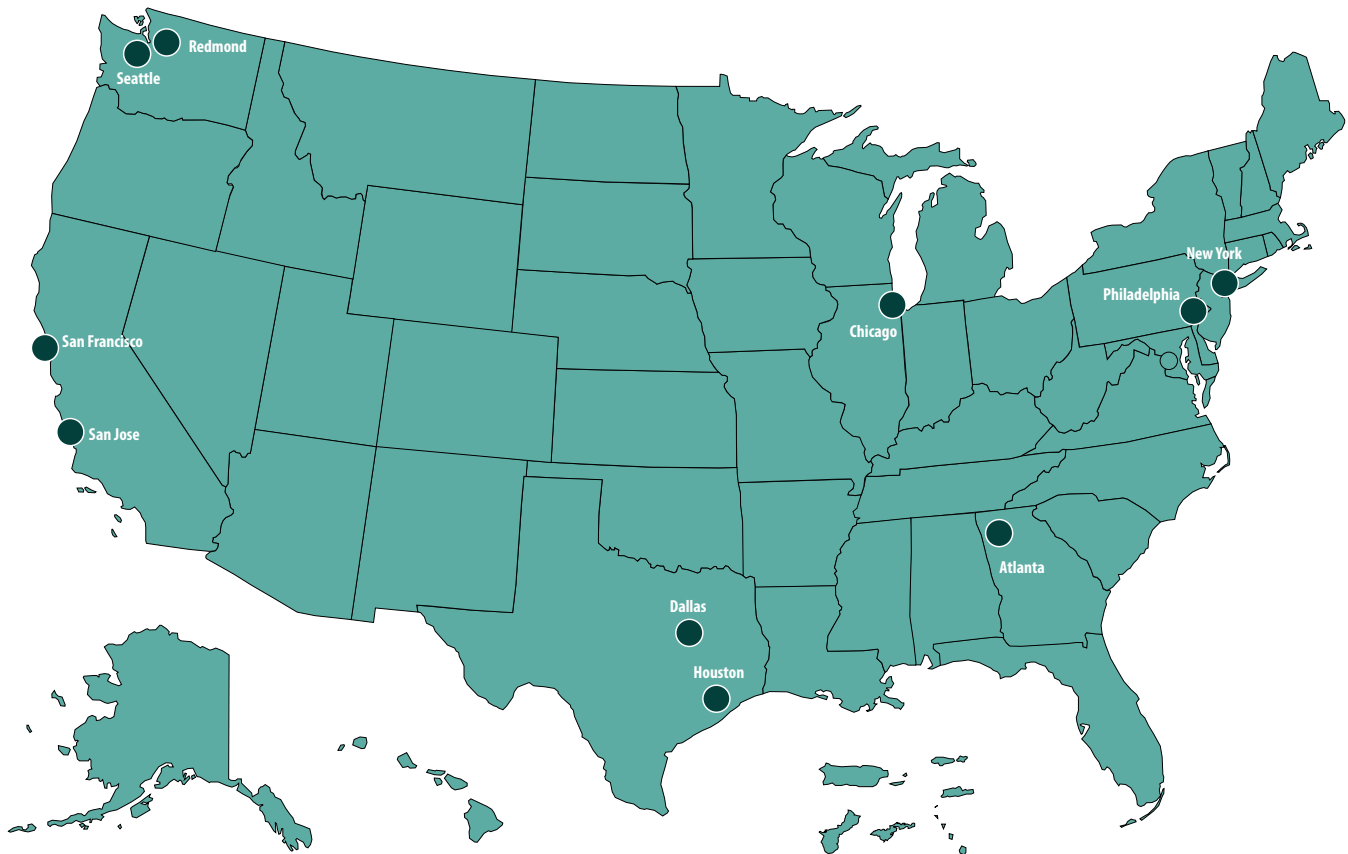

There were 21 States in which at least 5,000 certified Labor Conditions Applications (LCAs) were issued. California led the country in the most certified LCAs with over 18 percent of the total certified or 102,100. Colorado was 21st with 5,016. In addition to California, Texas, New York, New Jersey, and Illinois rounded out the top five and had just over 50 percent of the total certified LCAs. California increased its certified LCAs by 15,538 in FY 2015 over FY 2014; New Jersey increased by 10,330; Texas by 10,080; New York by 5,538; and Illinois by 5,254.

E-3 Australian Temporary Specialty Worker Program

The Emergency Supplemental Appropriations Act for Defense, the Global War on Terror, and Tsunami Relief, 2005, P.L. 109-13, produced the E-3 Australia Specialty Worker Program. This program allows employers to temporarily employ foreign professionals from Australia to work in the United States.

Current law provides for 10,500 new visas each fiscal year for Australian nationals seeking temporary work in specialty occupations that require, at a minimum, a bachelor's degree in the field of specialization. As with the H-1B and H-1B1 programs, an LCA is filed with OFLC. E-3 certification is valid for the period of employment indicated on the LCA, which may be up to two years. In FY 2015, 10,697 E-3 positions were certified from 9,328 applications. New York and California were the top work States for E-3 positions, each with well over 2,000 positions certified and together accounting for over 50 percent of the total E-3 positions certified in FY 2015. The top 10 occupations reflected on certified E-3 LCAs were Computer related occupations, business, management, and financial occupations.

H-1B1 Temporary Specialty Worker Program

On January 1, 2004, the H-1B1 Specialty Worker Program was implemented, allowing employers to temporarily employ foreign professionals from Chile and Singapore in the United States in specialty occupations. This program was established by the United States-Chile Free Trade Agreement Implementation Act (Public Law 108-77) and the United States-Singapore Free Trade Agreement Implementation Act (Public Law 108-78).

Current law provides for 1,400 new visas for foreign workers from Chile and 5,400 for foreign workers from Singapore each fiscal year. Similar to the H-1B and E-3 programs, an LCA is filed with OFLC. Like the H-1B certification, the H-1B1 certification is valid for the period of employment indicated on the LCA, which may be up to three years.

As defined by statute, a specialty occupation requires the theoretical and practical application of a body of specialized knowledge and a bachelor's degree or the equivalent in the specific specialty (e.g., Science, Medicine and Healthcare, Education, Biotechnology, and Business Specialties). Both H-1B1 Chile and H-1B1 Singapore allow for alternative credentials for certain professions, including Disaster Relief Claims Adjuster and Management Consultant professionals from both countries. For Chilean nationals only, Agricultural Managers and Physical Therapists can also qualify with alternative requirements.

In FY 2015, OFLC certified 614 H-1B1 Chile applications. The top work States for H-1B1 Chile positions certified were California and Florida, each with more than 140 positions certified out of 641 positions certified. These two States accounted for almost 44 percent of the positions certified for the H-1B1 Chile program.

The top 10 occupations for the H-1B1 Chile program in FY 2015 varied widely and included computer related occupations, which made up more than 18 percent of all positions certified for the H-1B1 Chile program. Other non-computer related occupations included marketing, financial, and architectural occupations.

Education in H-1B - Overview

In FY 2015, H-1B labor condition applications from educational employers accounted for 2.6 percent of the total positions certified. Over 75 percent of the positions certified for educational employers in FY 2015 were requested by colleges and universities, almost 18 percent were requested by elementary and secondary schools and more than half of one percent by junior colleges.

Educational employers continued to primarily seek positions in Education, Training, and Library occupations, with this occupational category constituting almost 47 percent of the positions certified, which was slightly lower than last year. This occupational category includes pre-school, kindergarten, elementary school, middle school, secondary school, and special education teachers, post-secondary teachers in their various specialty areas, teaching assistants, self-enrichment education teachers, librarians, curators, archivists, audio-visual and multimedia collections specialists, and instructional designers and coordinators.

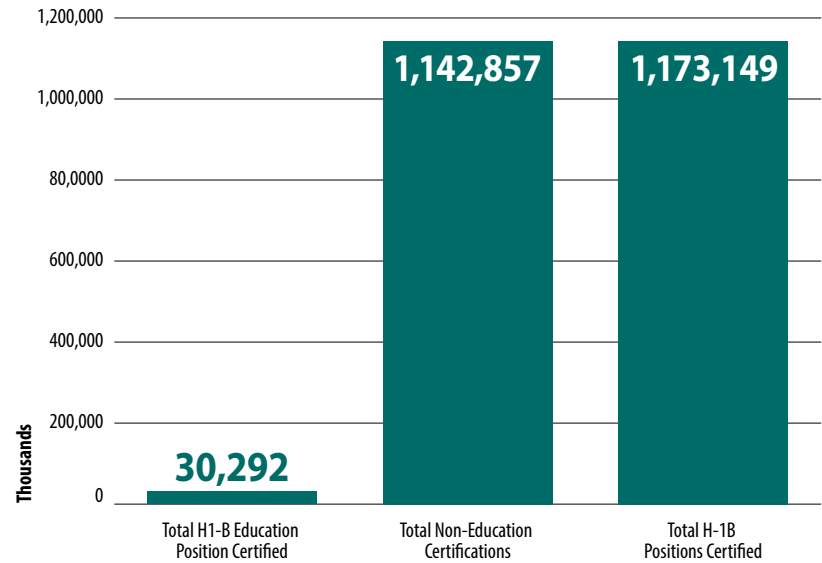

Life, Physical, and Social Science continued to be the next most sought occupational category, maintaining just fewer than 29 percent average of the positions certified for educational employers. Healthcare Practitioners and Technical occupations, Computer and Mathematical Operations occupations, and Architecture and Engineering occupations each maintained 3 to 7 percent of the other positions certified for educational employers. The remaining occupations individually accounted for 2 percent or less each for the positions certified for educational employers.

H-1B Education Certifications, by Type and Institution

In FY 2015, the States with the highest demand from educational employers each had at least 3000 certified positions. New York, Texas, and California saw the highest demand from educational employers in FY 2015. Even though New York has had the most positions certified with 3,917, still showed another steep decrease in annual positions certified for the State since its peak in FY 2012 when it had 10,933 positions certified. The New York City Department of Education, which seems to account for most of the fluctuations in the numbers, was responsible for more than 34 percent of all the positions certified. In New York, Maryland, and Michigan the top three educational employers in each State received over half of the total positions certified for educational employers in that State.

H-2A Temporary Labor Certification for Agricultural Workers

The H-2A nonimmigrant program is designed to provide our Nation’s farms with short-term agricultural labor when the number of available domestic workers is insufficient. H-2A labor certification is generally granted for activities lasting 10 months or less. Most occupations (e.g., field hand) require unskilled or low-skilled labor, while a few (e.g., combine operators) require specialized skills. There is no yearly limit (cap) on the number of foreign workers who may be issued H-2A visas. An employer seeking to employ agricultural workers under the H-2A program files an H-2A Application for Temporary Employment Certification with OFLC and performs recruitment activities to conduct a test of the labor market for U.S. workers subsequent to the filing of the application.

In FY 2015, OFLC certified 139,832 positions. There was an increase of 18 percent in the number of positions requested for H-2A job opportunities and an increase of almost 9 percent in the number of H-2A temporary employment certification applications certified in FY 2015 over FY 2014.

Summary of H-2A Specialty Occupations Program

VISA TYPE	ACTIONS	FY 2012	FY 2013	FY 2014	FY 2015	% CHANGE

States with More Than 2,000 H-2A Certifications

In FY 2015, employers applied for 145,874 agricultural labor positions, and OFLC certified 139,832. This represented an 18 percent increase in requested positions and an almost 20 percent increase in positions certified in FY 2015 over the previous fiscal year.

OFLC certified over 2,000 positions for work in 17 States. Of these States, Florida, North Carolina, Georgia, Washington, California, Louisiana, Kentucky, and New York had the greatest demand, with over 5,000 positions certified for each State. After eight consecutive years, North Carolina is no longer the top state for H-2A positions certified. This year, Florida is the new top state for H-2A positions certified with 17,942 certified positions.

Top 10 Employers with Most H-2A Certified Workers

In FY 2015, the North Carolina Growers Association, Inc. was the largest requestor of H-2A workers, having 11,767 certified positions and accounting for 66 percent of North Carolina's H-2A positions. The next largest petitioner was the Washington Farm Labor Association with 7,895 certified positions and accounting for almost 67 percent of Washington's H-2A positions. Fresh Harvest, Inc. is the third largest petitioner with 3,176 certified positions and accounting for nearly 37 percent of Washington's H-2A positions.

H-2B Temporary Labor Certification for Non-Agricultural Workers

The H-2B nonimmigrant program provides an avenue for employers to hire foreign workers to perform temporary, nonagricultural services or labor on a one-time, seasonal, peakload, or intermittent basis. Under the regulations applicable in the first two quarters of 2015, the employer’s seasonable, peakload, or intermittent labor need must have been 10 months or less. Under the 2015 Interim Final Rule, applicable in the third and fourth quarters of FY 2015, the employer’s seasonal, peakload, or intermittent labor need must have been nine months or less. Under both rules, an employer’s need for labor resulting from a one-time occurrence could equal three years or less. H-2B occupations range across industries, including landscaping services, seafood processors, mobile carnivals, construction, housekeeping, hospitality, and forestry.

In FY 2015, OFLC rendered 6,521 total application determinations, which constitutes a 19.3 percent increase over FY 2014. Of those determinations, 5,112 were decisions to certify the application, an increase of 10.22 percent over FY 2014. Applicants requested OFLC certify a total of 126,138 positions, a 17.10 percent increase over FY 2014. Of those requested positions, OFLC certified 101,765, an 8.67 percent increase over FY 2014. OFLC’s final certification rate for requested positions was approximately 81 percent.

Summary of H-2B Temporary Labor Certification Program

States with More than 2,500 H-2B Certified Positions

Fifteen States had over 2,500 positions certified during the fiscal year. For the fourth consecutive year, the highest number of applications and positions certified originated in Texas, most commonly for Landscaping and Groundskeeping Workers in cities like Austin, Houston, San Antonio, and Dallas. Florida, Colorado, Louisiana, and Maryland constituted the remainder of the top five, with 301, 214, 213, and 188 applications certified, respectively. OFLC certified a total of 6,847 positions for Florida; 4,861 for Colorado; 4,660 for Louisiana; and 4,586 for Maryland.

APPENDIX B

Agricultural Certification Statistics

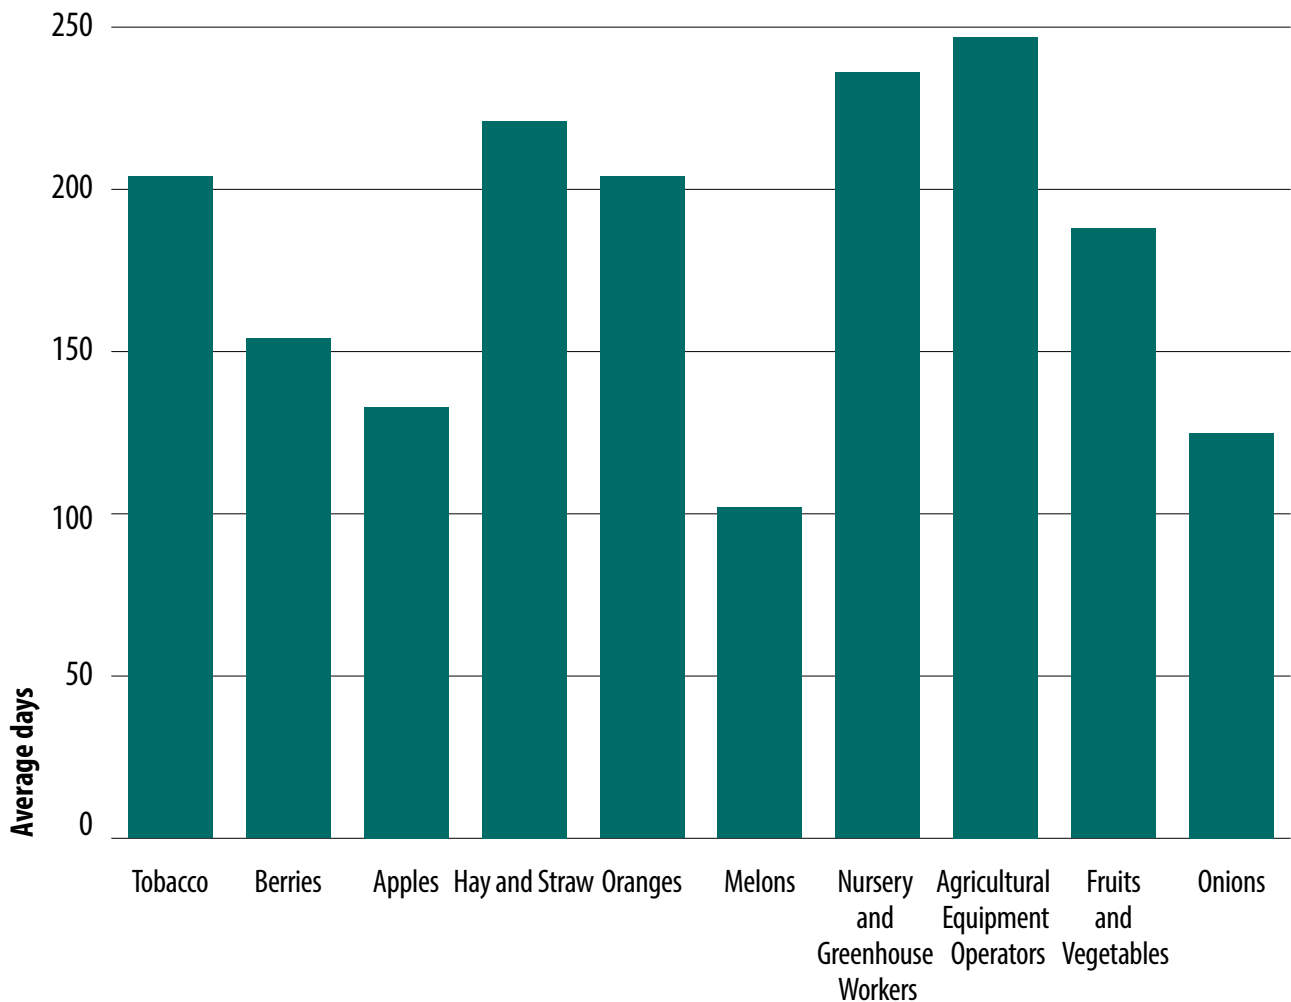

Top 10 Crops – Positions Certified by Month Certification Begins

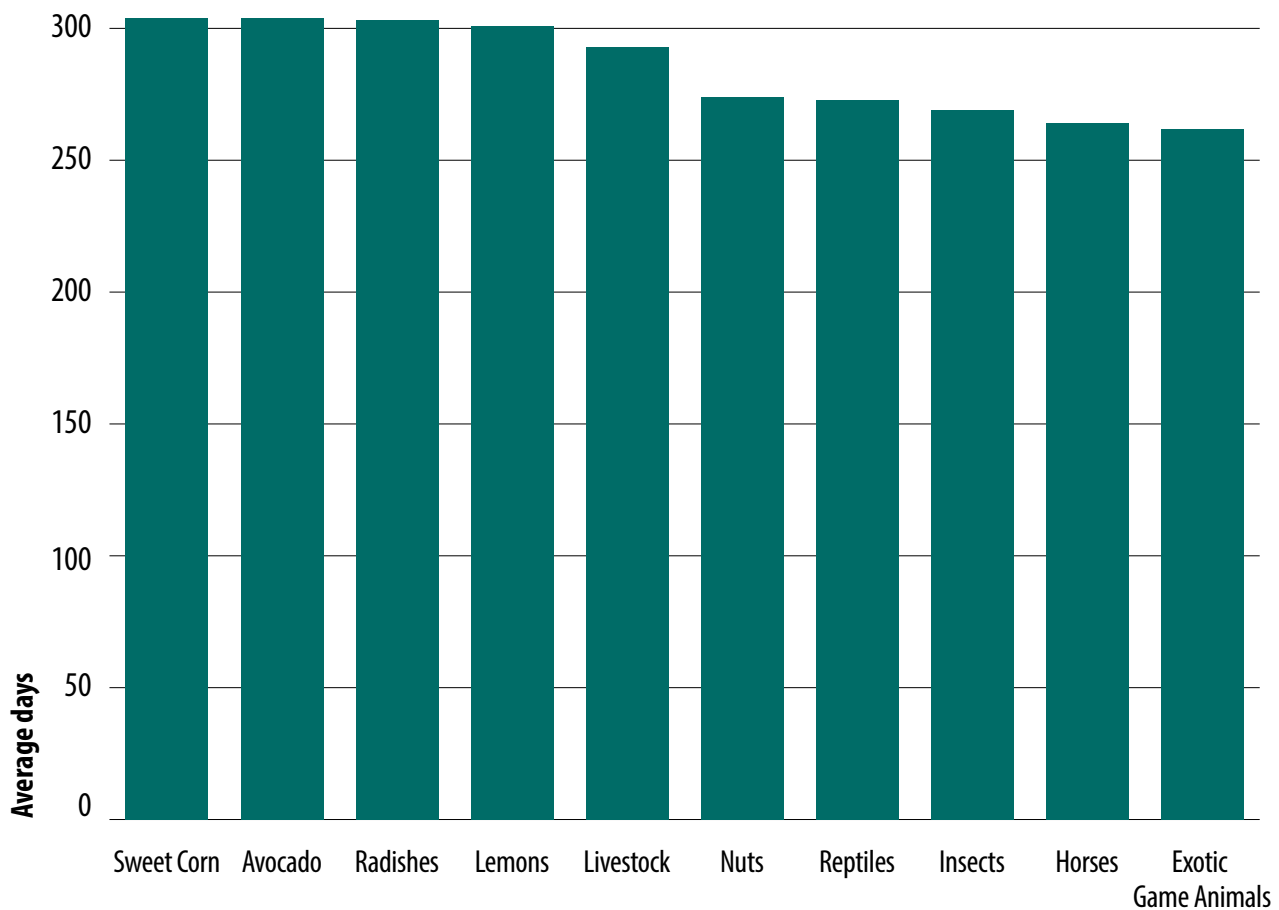

Average Duration of Positions Certified for the Top 10 Crops

In FY 2015, the average period certified for positions in each of the top 10 crops was between 3 and 8 months. Onions and melons ranked as the two crops with the shortest average certification period, with average certification periods of 3 to 4 months. Positions involving apples, berries, and other fruits and vegetables followed, with average certification periods of just over 4.5 months to 6 months. Tobacco, oranges, and hay and straw, reflecting roughly 6.8 to 7.3 month certification periods, represented the next longest average certification period among the top 10 crops. Nursery and greenhouse certifications lasted about 7.5 months. Employers with agricultural equipment operators represented the group receiving the longest average certification period in FY 2015, with an average period of nearly 8 months.

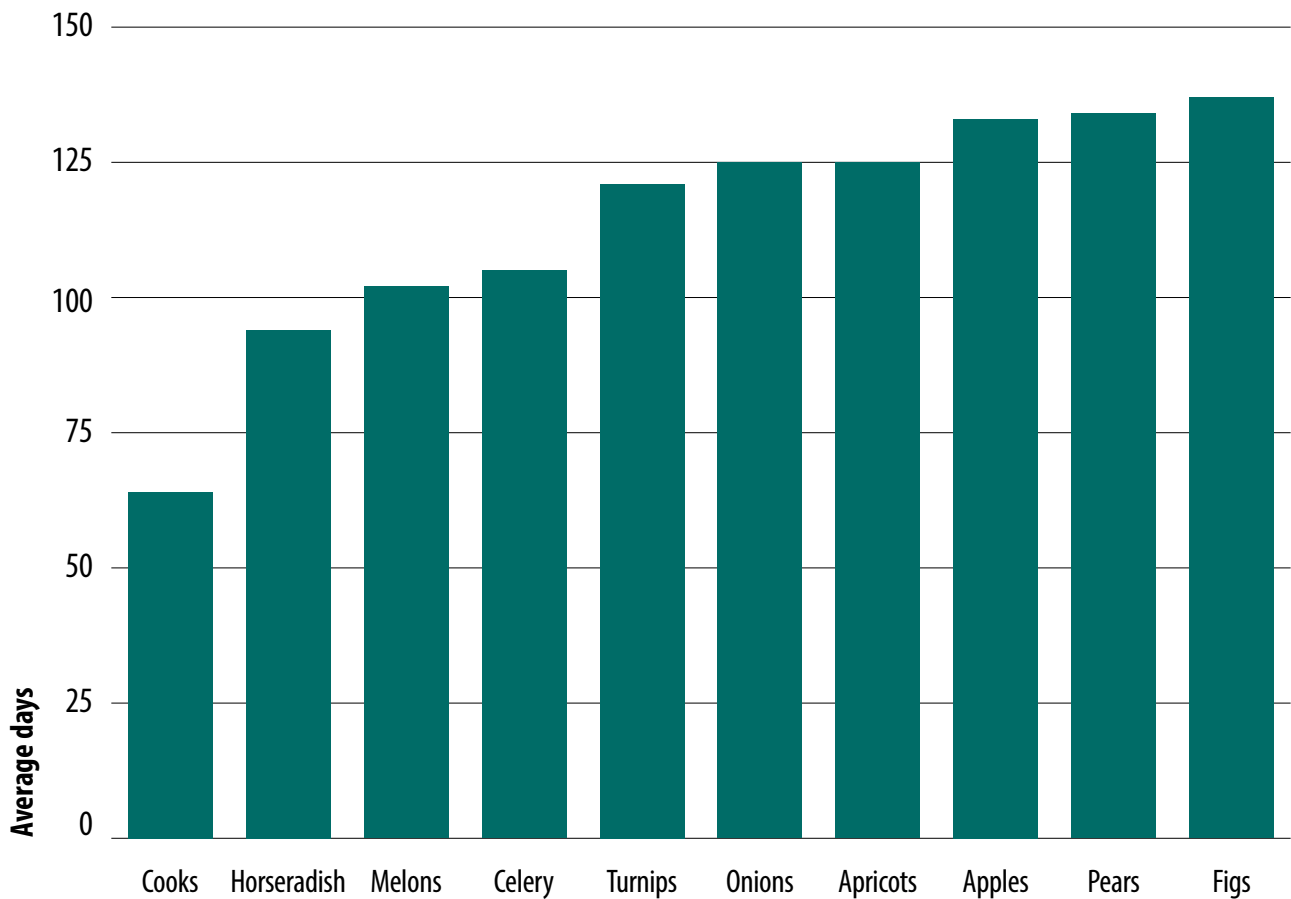

Commodities with the Longest Certification Periods Overall

The Department issues a labor certification, when appropriate, after reviewing an employer’s fact-specific request for temporary agricultural workers under the H-2A program. In all cases, the nature of the employer’s own need for temporary agricultural or services determines the certification period for the specific need for temporary agricultural workers may or may not be representative of other employers with the same crop or agricultural commodity. In FY 2015, the longest certification period was granted to employers engaged in sweet corn based on demonstrated need for temporary agricultural workers for a period of a little over 10 months. Employers engaged in growing avocado and radishes closely followed those engaged in sweet corn, both also averaging certifications for just a little over 10 months. The remaining employers with the longest average certifications all demonstrated a need for between 8.6 and 9.3 months. Those employers are engaged in growing lemons and nuts, as well as raising several species: livestock, reptiles, insects, horses, and exotic game animals.

Commodities with the Shortest Certification Periods Overall

For some crops and agricultural commodities, as well as workers in support of the production of such crops and commodities, employers seek temporary labor or services for a short, concentrated period of time. In FY 2015, each of the 10 crops and agricultural commodities, and support activities, with the longest certification periods represented temporary agricultural labor and services occurring for less than 5 months. Cooks and horseradish farming represent the shortest certification periods, using agricultural workers for just shy of 2 months and 3 months, respectively. Among the remaining crops or agricultural commodities with the shortest certification periods in FY 2015, farmers growing melons and celery sought temporary workers for roughly 3.5 months. While farmers growing turnips, onions, apricots, apples, pears, and figs sought temporary workers for approximately 4 to 4.5 months.
